Spectrum Community Solutions does not provide a VPN option, but if you have a VPN from another location the WiFi will accommodate it.

NETWORK SECURITY AND VERSION
Devices in your personal group will be able to communicate with each other, but no other users on the group will be able to “see” your devices. Credentials are required to join the network.

The WiFi equipment installed in your unit utilizes the 802.11a/b/g/n on both the 2.4GHz and 5GHz bands. While your devices will connect and run regardless of what version of WiFi they use, the fastest speeds will be obtained with those devices that also have 802.11n capability.
