THEMED HOUSING DESCRIPTIONS

What is CSE Interest Housing?

Description: The Engineering and Computer Science Scholar's floor connects computer science majors and engineering majors to their departments, the Jacobs School of Engineering and their colleagues. By being a part of this community, students will receive specialized attention that will aid them in their studies at UC San Diego. This community seeks to engage students and create an environment with a broad range of backgrounds, interests, and experiences. For specific information about this program, please see your Residence Life website or contact your Assistant Director of Residence Life.

Mission Statement: The Village and Academic divisions at UC San Diego will collaborate to create a continuing Live and Learn student community with a focus towards a specific academic program among self-selected groups of students who are drawn together by shared goals and common intellectual interests.

Learning Outcomes/Objectives: Students that participate in the Engineering and Computer Science community at The Village will:

- Identify other students in which he/she related to as a result of the program
- Describe how the CSE scholars community contributed to his/her academic growth
- List more professors and connections he/she has made within the CSE community as a result of the community
- Explain the positive impact at least three of the program events has on his/her learning as demonstrated by a post-survey

Programming Initiatives: Residents will be required to attend at least five programs and three seminars hosted by any department or student org in Jacobs School of Engineering.

Residents will also be required to volunteer for one outreach event via the IDEA Center or through Jacobs School of Engineering. Volunteer resources can be found here:
